

**2017 STARTALK Fall Conference**  
**DESIGNING LEARNER-CENTERED**  
**CHECKS FOR LEARNING:**  
**ENHANCING L2 LEARNING THROUGH DIGITAL**  
**STORYTELLING AND CONTEXTUALIZED TASKS**

**STARTALK Chinese Student Program @ Wofford College**

**Yongfang Zhang, Na Li, Antonia Schleicher**

# WORKSHOP OUTCOMES

- I can better understand the language learning process through discussion of Second Language Acquisition and memory models.
- I can learn and apply strategies to provide comprehensible input and making learning relevant and meaningful through digital storytelling.
- I can experience and design contextualized tasks to facilitate learners' performance and help internalize their learning.

# WHY THIS WORKSHOP?

- STARTALK Principle: Facilitating a Learner-Centered Classroom
- In learner-centered teaching, the focus is on the student as a learner and how to improve their learning and success, rather than just providing more opportunities for learners to practice or transit information.

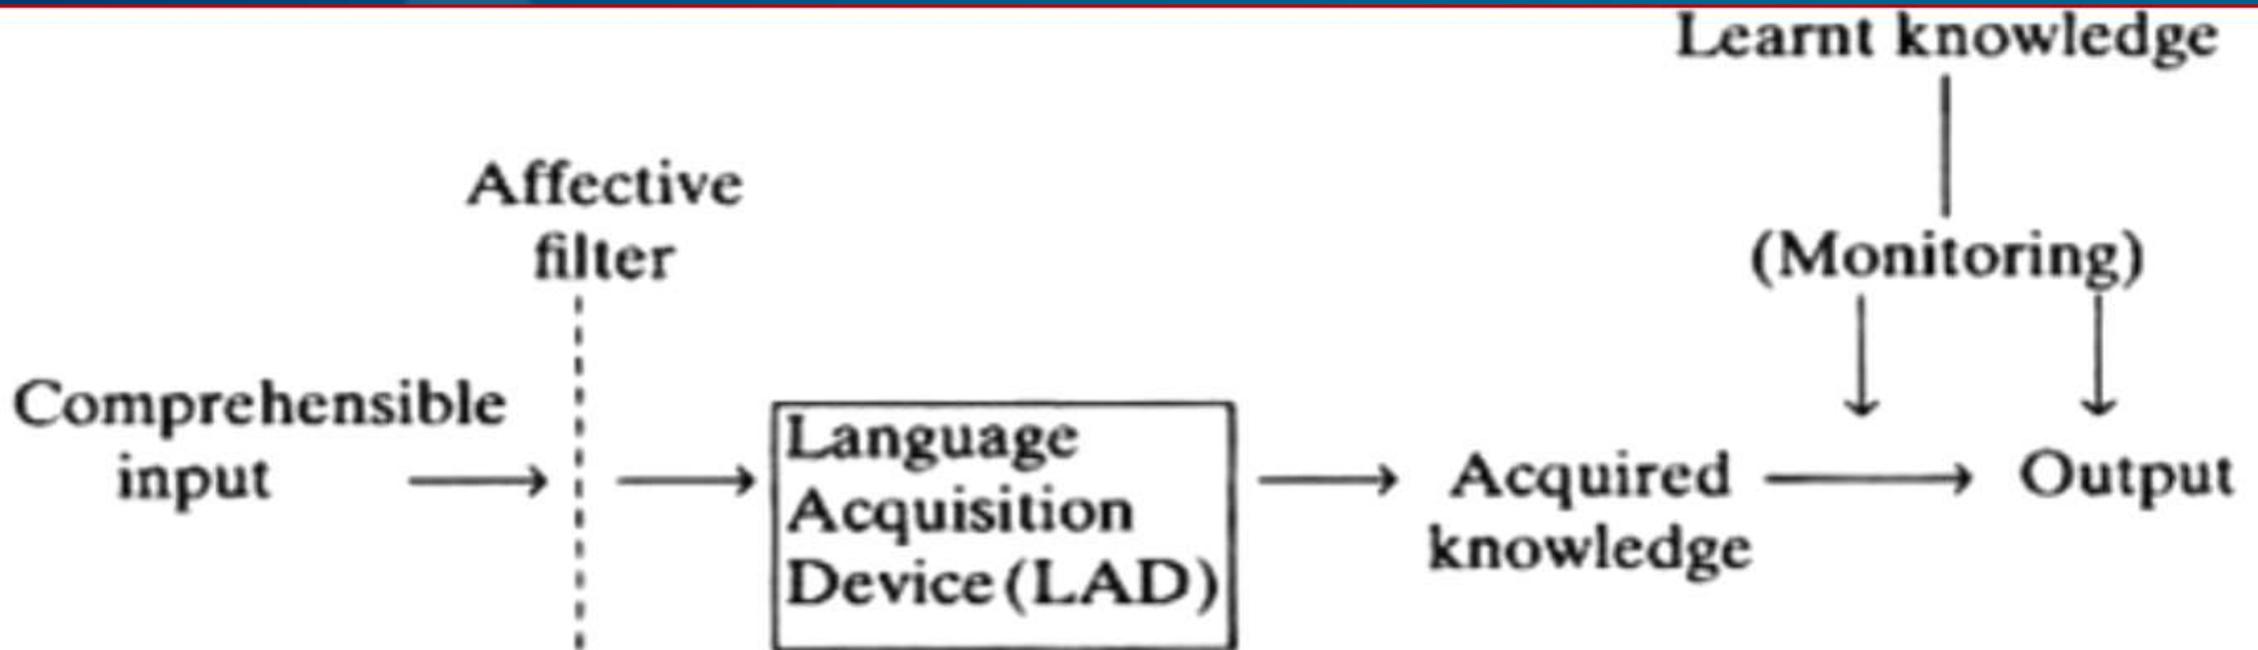

# PROBLEM OF PRACTICE

- Learning in STARTALK can be very different from our regular students' learning
  - No access v.s. a sequence of courses
  - 7.5 hours per day v.s. 1/day or 3/week, 50-minute each
  - Can't prepare beforehand v.s. well prepared
- Challenges
  - How can we motivate and engage learners fully to maximize their learning outcome
  - How can we help them retain what they have learned as much as possible

# TOOL: the Language Learning Process

- Understand the learning process
  - Facilitate the learning process
  - Engage participants in various learning activities in different communication modes
- ➔ get closer to our continuous improvement goal:  
Enable them to use the target language successfully

# Learning Process

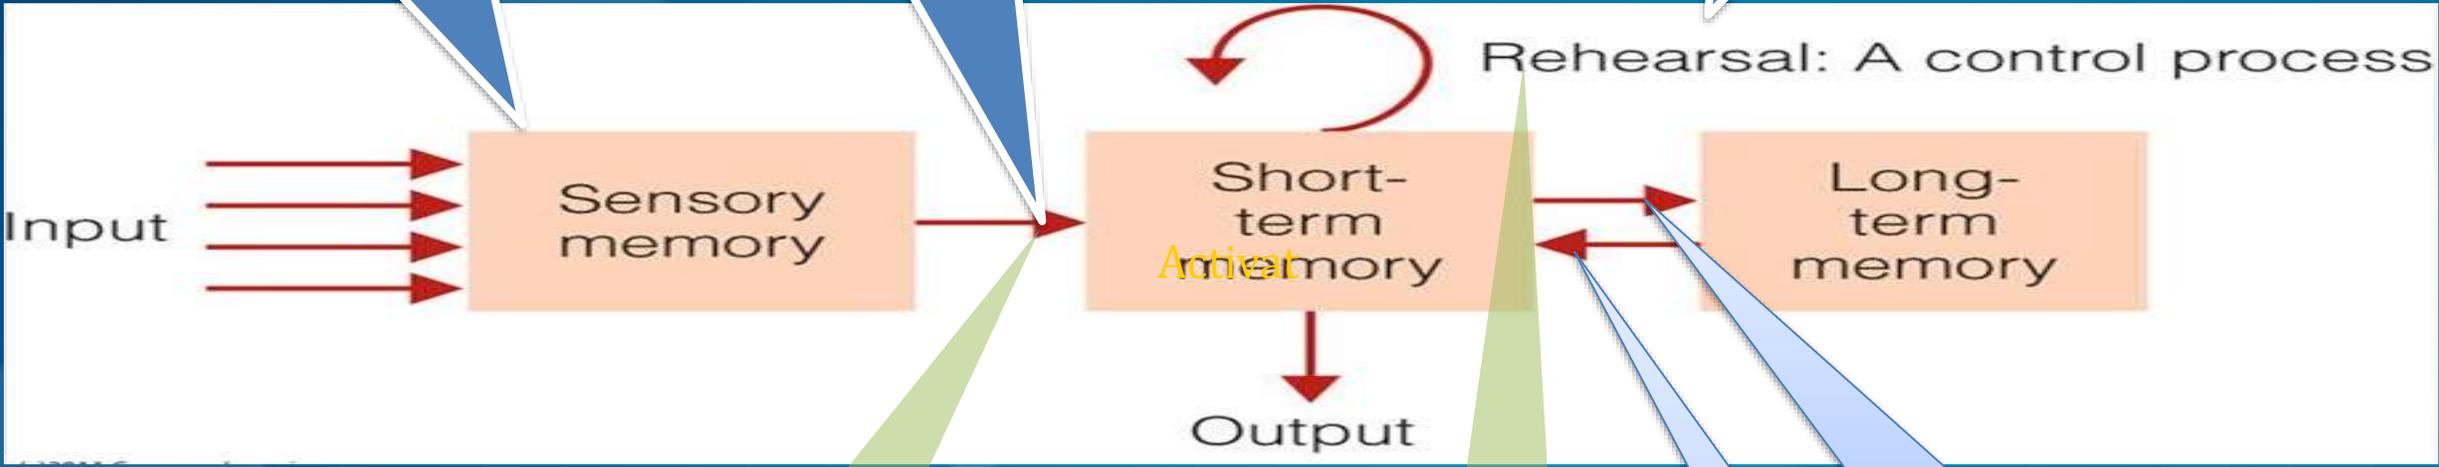

*The Input Hypothesis Model of L2 learning and production (adapted from Krashen, 1982, pp. 16 and 32; and Gregg, 1984)*

Touch store  
Hearing store  
Vision store

Attention  
(1) Bottom-up  
(2) Top-down

(1) Mediation  
(2) Mnemonics

Unattended information is lost

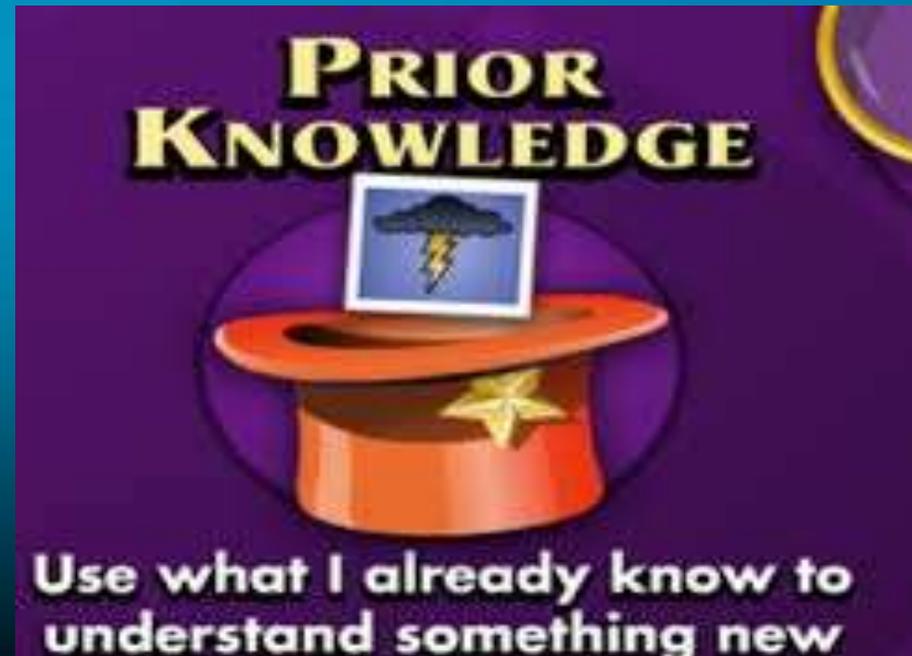

Unrehearsed information is lost

Encoding

Retrieval

# Activate Learners' Prior Knowledge

- Understand input with the help of prior knowledge
- Learn and retain more if students can connect what they are learning to accurate and relevant prior knowledge
- New knowledge sticks better when it has prior knowledge to stick to.

# SOLUTION: Facilitate the Learning Process

## Learner-centered

- Activate learners' linguistic prior knowledge
- Connect learning to learners' everyday experience and knowledge of the world (extra-linguistic prior knowledge)
- Design learning tasks to engage learners to apply language in real-world situations in a spontaneous and non-rehearsed context

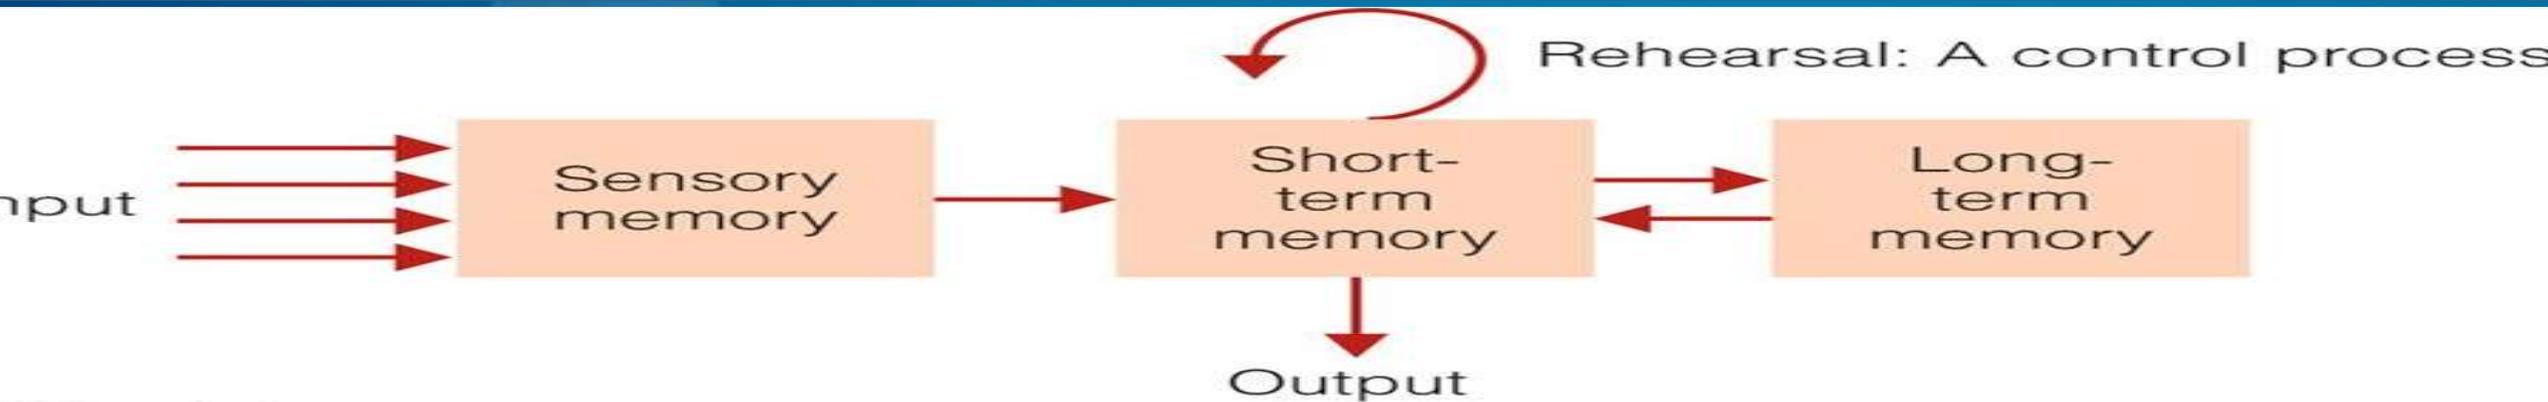

# Activate Prior Linguistic Knowledge

- Compound words
  - Ice tea → bīngchá; hot tea → rèchá
  - Ice water → bīngshuǐ; hot water → rèshuǐ
- Word order: subject + verb + object
  - I like salad → wǒ xǐhuān sālā
- Transliterated words (*transliteration*)
  - Daily items (salad → sālā), book titles (Harry Potter → Hālibōtè), country names (Poland → Bōlán), People's names (Taylor Swift → Tàilè Sīwēifūtè)

# Provide input that can reinforce sensory and attention

Use digital stories that are familiar and relevant to learners

- Comprehensible → reduce the learning complexity
- Meaningful, interesting, relevant → pay attention, reduce learning anxiety
- Digital → strong, intense stimulus which can increase the rate of nerve firing

## Design tasks that can reinforce encoding and help retrieval

- A variety of activities (repeated yet spiraled) → internalize learning & reach automaticity
- Unrehearsed → grant ownership of learning
- Meaningful, purposeful, motivational → engage learners & reduce anxiety
- Contextualized → knowing how, when, why, to say what to whom (Remember the future)

# STEPS FOR APPLICATION: Learners and Facilitate their Learning Process

- Step 1: Identify learners
- Step 2: Identify their interest and prior knowledge to use
- Step 3: Reflect on the learning process and identify the areas to work on to facilitate the learning process

# POTENTIAL PROBLEMS

- Tip 1: Carefully think about your program goal
- Tip 2: Be sure to think about the teaching context

# ACTIVE PARTICIPATION

- Who are your learners?
- What are they interested in?
- What prior knowledge can you use?
- What in the target culture are relevant and interesting to them? Are there any counterparts in the learners' culture?

# ADAPTING SOLUTIONS

- Describe your learners' learning process.
- What you can do to facilitate their learning process from input to output?

# STEPS FOR APPLICATION: Comprehensible Input and Contextualized Learning

jiā  
他家有六口人,

bà ba mā ma  
他的爸爸、妈妈、

jiějie mèimei  
一个姐姐和两个妹妹。

yīshēng  
他的爸爸妈妈都是医生。

pǎobù  
他也喜欢跑步。

péng you yì qǐ  
他今年和美国朋友一起

Tiān ān mén.  
在北京天安门跑步。

2016

máng  
他每天都很忙,

kè  
因为他有很多课。

bì yè  
所以他高中毕业以后去了  
哈佛大学。

在哈佛大学,    
他上了大学一年级和二年级,  
   
可是没有上三年级和四年级。

因为他学中文得很好,

小扎是我的英雄  
yīngxióng

他帮很多人用  
Facebook 联系在一起,

qiángrén  
他帮穷人看病和上学。

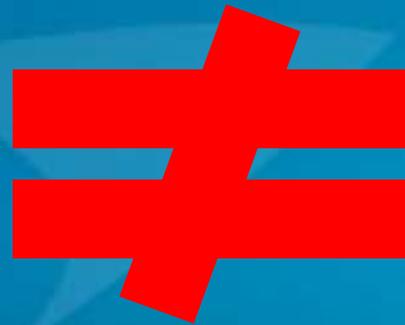

# Authentic Materials

# From Input to Output

100%  
Comprehensible  
Input

100%  
Students' Output

# Scaffold

- Comprehensible Input
- Interactive Storytelling

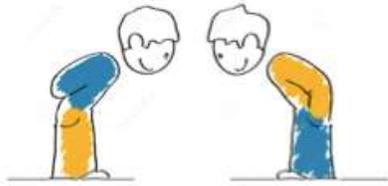

- Contextualized Tasks
- Learner-Centered Activities

- Morning Assembly
- Lunch Presentation
- Afternoon Project
- Flipgrid
- Linguafolio

# Interpretive Communication

yǒu lǐmào

所以他很有礼貌。

yǒuqián shànláng  
今天的小扎很有钱，他和他的妻子也都很善良。

yǒng gǎn

因为他很勇敢，  
救了孩子，灭了火。

# Interpersonal Communication

你选谁做三班  
班长(Class President)?

Wei Yi'en

Peng Tian'le

Mao Kai

Rong Ke

Lei Kai

# Presentational Communication

## 请选我!

3-minute  
preparation

你叫什么名字?

你今年多大?

你有什么爱好?

你做什么做得很好?

你最喜欢上什么课? 为什么?

你不喜欢上什么课? 为什么?

你的性格?

# ACTIVE PARTICIPATION: Learning Through Stories

- What is the theme of your program?
- Is there any story that has roots in your language and culture and is familiar to your participants?
- Can you include different aspects of the story in your program curriculum each day?
- Please choose an aspect of the story, and then design tasks for three communication modes.
- How will you provide activities to facilitate the learning process from comprehensible input to output? (I do → we do → you do)

# Other Strategies

- Self introduction during lunch table
- Rewarding system to encourage extra learning beyond the camp time
- Resources for continued learning
  - Quizlet
  - Canvas

# Day1 VS Day7

- Yongfang Zhang, [zhangy@wofford.edu](mailto:zhangy@wofford.edu)

# Your Feedback

Most useful information

What I plan to apply

Ideas I will explore further

I wish

# Backward Design Principles

1. Identify desired results

2. Determine acceptable evidence

3. Plan learning experiences & instruction

# ACTIVE PARTICIPATION

- Pick one picture and create a dialogue while considering the following ten words: “Knowing how, when, and why to say what to whom”. You can describe time, location, roles, relationship between roles, and script.
- Share the context/script with the group
- Discuss within your group on what contexts to be included, the order to present the contexts in the program

# ADAPTING SOLUTIONS

- What is the theme of your program?
- What functions are included?
- What are the potential tasks?
- How do you arrange the tasks?
- How do you contextualize the tasks?

# STEPS FOR APPLICATION: Contextualized Tasks

- Step 1: Decide on tasks that are meaningful, purposeful, interesting, and motivational for learners
- Step 2: Arrange the tasks and contextualize them
- Step 3: Engage learners in the tasks and provide feedback

# STEPS FOR APPLICATION: Comprehensible Input and Contextualized Tasks

- Step 1: Identify the meaning of language
- Step 2: Think of various tasks that fit the meaning of language and that are meaningful, purposeful, interesting, and motivational for learners
- Step 3: Arrange the tasks and contextualize them
- Step 4: Engage learners in the contextualized tasks and provide feedback

# POTENTIAL PROBLEMS

Tips: Be sure to

- focus on meaning instead of form
- use tasks as the organizing principle instead of as the final step
- include tasks that are meaningful, interesting, relevant to learners, and to arrange tasks into a learning repertoire
- think about how to present the tasks and engage learners
- provide feedback effectively

# ADAPTING SOLUTIONS

- What are the potential tasks?
- How do you arrange the tasks?
- How will you contextualize the tasks?
